Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 27 june 2025 |
|---------------|--|
| Team ID | LTVIP2025TMID59834 |
| Project Name | TrafficTelligence: Advanced Traffic Volume |
| | Estimation with Machine Learning |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR | Functional Requirement | Sub Requirement (Story / Sub-Task) |
|------|-------------------------------|--|
| No. | (Epic) | |
| FR-1 | Fruits & Vegetables freshness | Removing rotten fruits and vegetables |
| FR-2 | Accuracy | Accuracy of predicting the fruits and vegetables freshness |
| FR-3 | User Satisfaction | Satisfaction of user with the accuracy of prediction |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR | Non-Functional Requirement | Description |
|-------|----------------------------|--|
| No. | _ | _ |
| NFR-1 | Usability | The system shall provide a simple, and user- |
| | | friendly web interface that allows users with |
| | | minimal technical knowledge to easily view |
| | | freshness predictions. |
| NFR-2 | Reliability | The system shall consistently provide accurate |
| | - | predictions under normal operating conditions. |
| NFR-3 | Performance | The system shall deliver predictions within 2-3 |
| | | seconds with good accuracy. |
| NFR-4 | Availability | The system shall be available and operational at |
| | | all times during demonstrations or real-time |
| | | usage sessions. |
| NFR-5 | Scalability | The system design shall allow for future |
| | | scalability, including handling higher user traffic, |
| | | supporting batch prediction. |
